U.S. Patent and Trademark Office PTOL-303 (Rev. 7-05)

Continuation of 3. NOTE: With regard to section D. 1. on page 3 of the Remarks, the Examiner respectfully disagrees. Applicant argues that Spies shows in Fig. 5 at most one track of magnetic elements that is arranged laterally next to each of the base bodies 60,70. Applicant argues that while there are magnetic elements arranged interiorly of each base body 60,70, those magnetic elements are arranged on the interior surface of the base body. (see lines 8-12 of page 3 of the Remarks). To this argument, the Examiner notes that the interior magnetic elements appear to be located on recessed tracks. See base body 60 in Figure 5 for example and lines 5-14 of column 5 of Spies. Note the recessed tracks, the magnetic elements, and the concentric rings between the recessed tracks. These recesses causes the magnetic elements to be arranged laterally next to base bodies 60,70. With regard to section D. 2. on page 4-5, the Examiner notes that the newly added claimed features were not previously found in claim 11 or any dependent of claim 11 and therefore the newly added claimed features require further consideration. With regard to section D. 3, on page 5 of the Remarks, the Examiner notes that the newly added claimed features were not previously found in claim 14 or any dependent of claim 14 and therefore the newly added claimed features require further consideration. With regard to section D. 4, on pages 5-6 of the Remarks, the Examiner notes that the newly added claimed features were not previously found in claim 31 or any dependent of claim 31 and therefore the newly added claimed features require further consideration. With regard to section D. 5. on page 6 of the Remarks, the Examiner notes that the newly added claimed features were not previously found in claim 35 or any dependent of claim 35 and therefore the newly added claimed features require further consideration. With regard to section D. 6. on page 7 of the Remarks, the Examiner notes that the newly added claimed features were not previously found in claim 36 or any dependent of claim 36 and therefore the newly added claimed features require further consideration. With regard to Applicant's comment regarding the Kitaori reference at the bottom of page 8 of the Remarks. Applicant is correct is assuming that Kitaori, and not Noriyuki, is the correct reference.
